Dear Dr. Green:

I know we have not had an opportunity to get together and discuss your appointment as the attending physician for the J. F. Shea Co., Inc., on the Vat Tunnel Project in Utah. I hope to be in Heber City, either late April or early May, to sit down with you and discuss the matter. I have talked with Grove Construction and S. A. Healy Company personnel. They both gave you a very high recommendation, as did Underwriter's Adjusting Company. Therefore, I feel that we will be most fortunate if we can obtain your services for this project.

Attached is a resume for Dorothy Milliman, whom we are considering as the Industrial Nurse for the project. Our offer to her will depend on your approval and also whether the Bureau will approve her husband as the Project Safety Superintendent. Our plan is to furnish a trailer for living quarters, on the job, for both of them and thus have twenty-four hour coverage. I have personally known Dorothy for over fourteen years and feel that she would do an excellent job as the Project Nurse. During the past two months, she has been working in the Orthopedics Ward of a hospital. This does not reflect on her resume.

Your approval of the prospective applicant is solicited. I am looking forward to meeting you and discussing our project.

Very truly yours,

Howard Cutter
Director of Safety

Division of Health
BUILDING MAIL

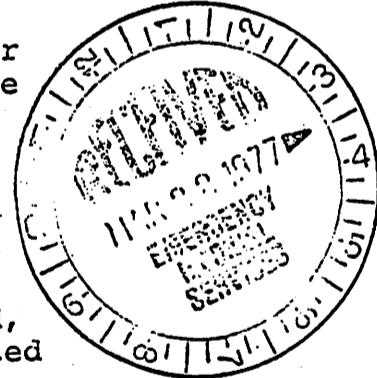

Dear Dr. Olsen:

You have asked the question as to whether or not a privately owned vehicle at an industrial plant which is used for emergency service at that plant only must meet all of the requirements set forth in Title 26, Chapter 30, Utah Code Ann. 1953, as amended. I would be of the opinion that the requirements therein were not intended to apply to such vehicles. The word ambulance is defined as follows:

(Ambulance means any privately or publicly owned land or air vehicle especially designed, instructed, or modified and equipped and is intended to be used for and is maintained or operated for transportation upon the streets, highways or airways in this state of individuals who are sick, injured, wounded, or otherwise incapacitated or helpless).

It would seem that this broad wording is intended to cover ambulatory service to the public. This view would seem further supported by the provisions in 26-30-6 which reads as follows:

"The division shall have the power and duty subject to the policy making powers of the board to supervise and regulate ambulance services in this state. The board shall have the power and

Dr. Green:

I enjoyed our meeting of August 7th (Mon) and appreciated your warm welcome to the area. I am looking forward to working with you and I know I'll be calling on you for medical advice and also support and encouragement to continue my education by observing the Emergency Room on busy weekends. I've already personally contacted Terry Wm. Lange of Wasatch County Hospital and also some of the nursing staff. Everyone there seems very receptive to allowing me to observe on busy weekends.

As you requested (on phone today) here is a copy of the standing orders. Also, the following is a list of a few more items to be considered on the standing orders:

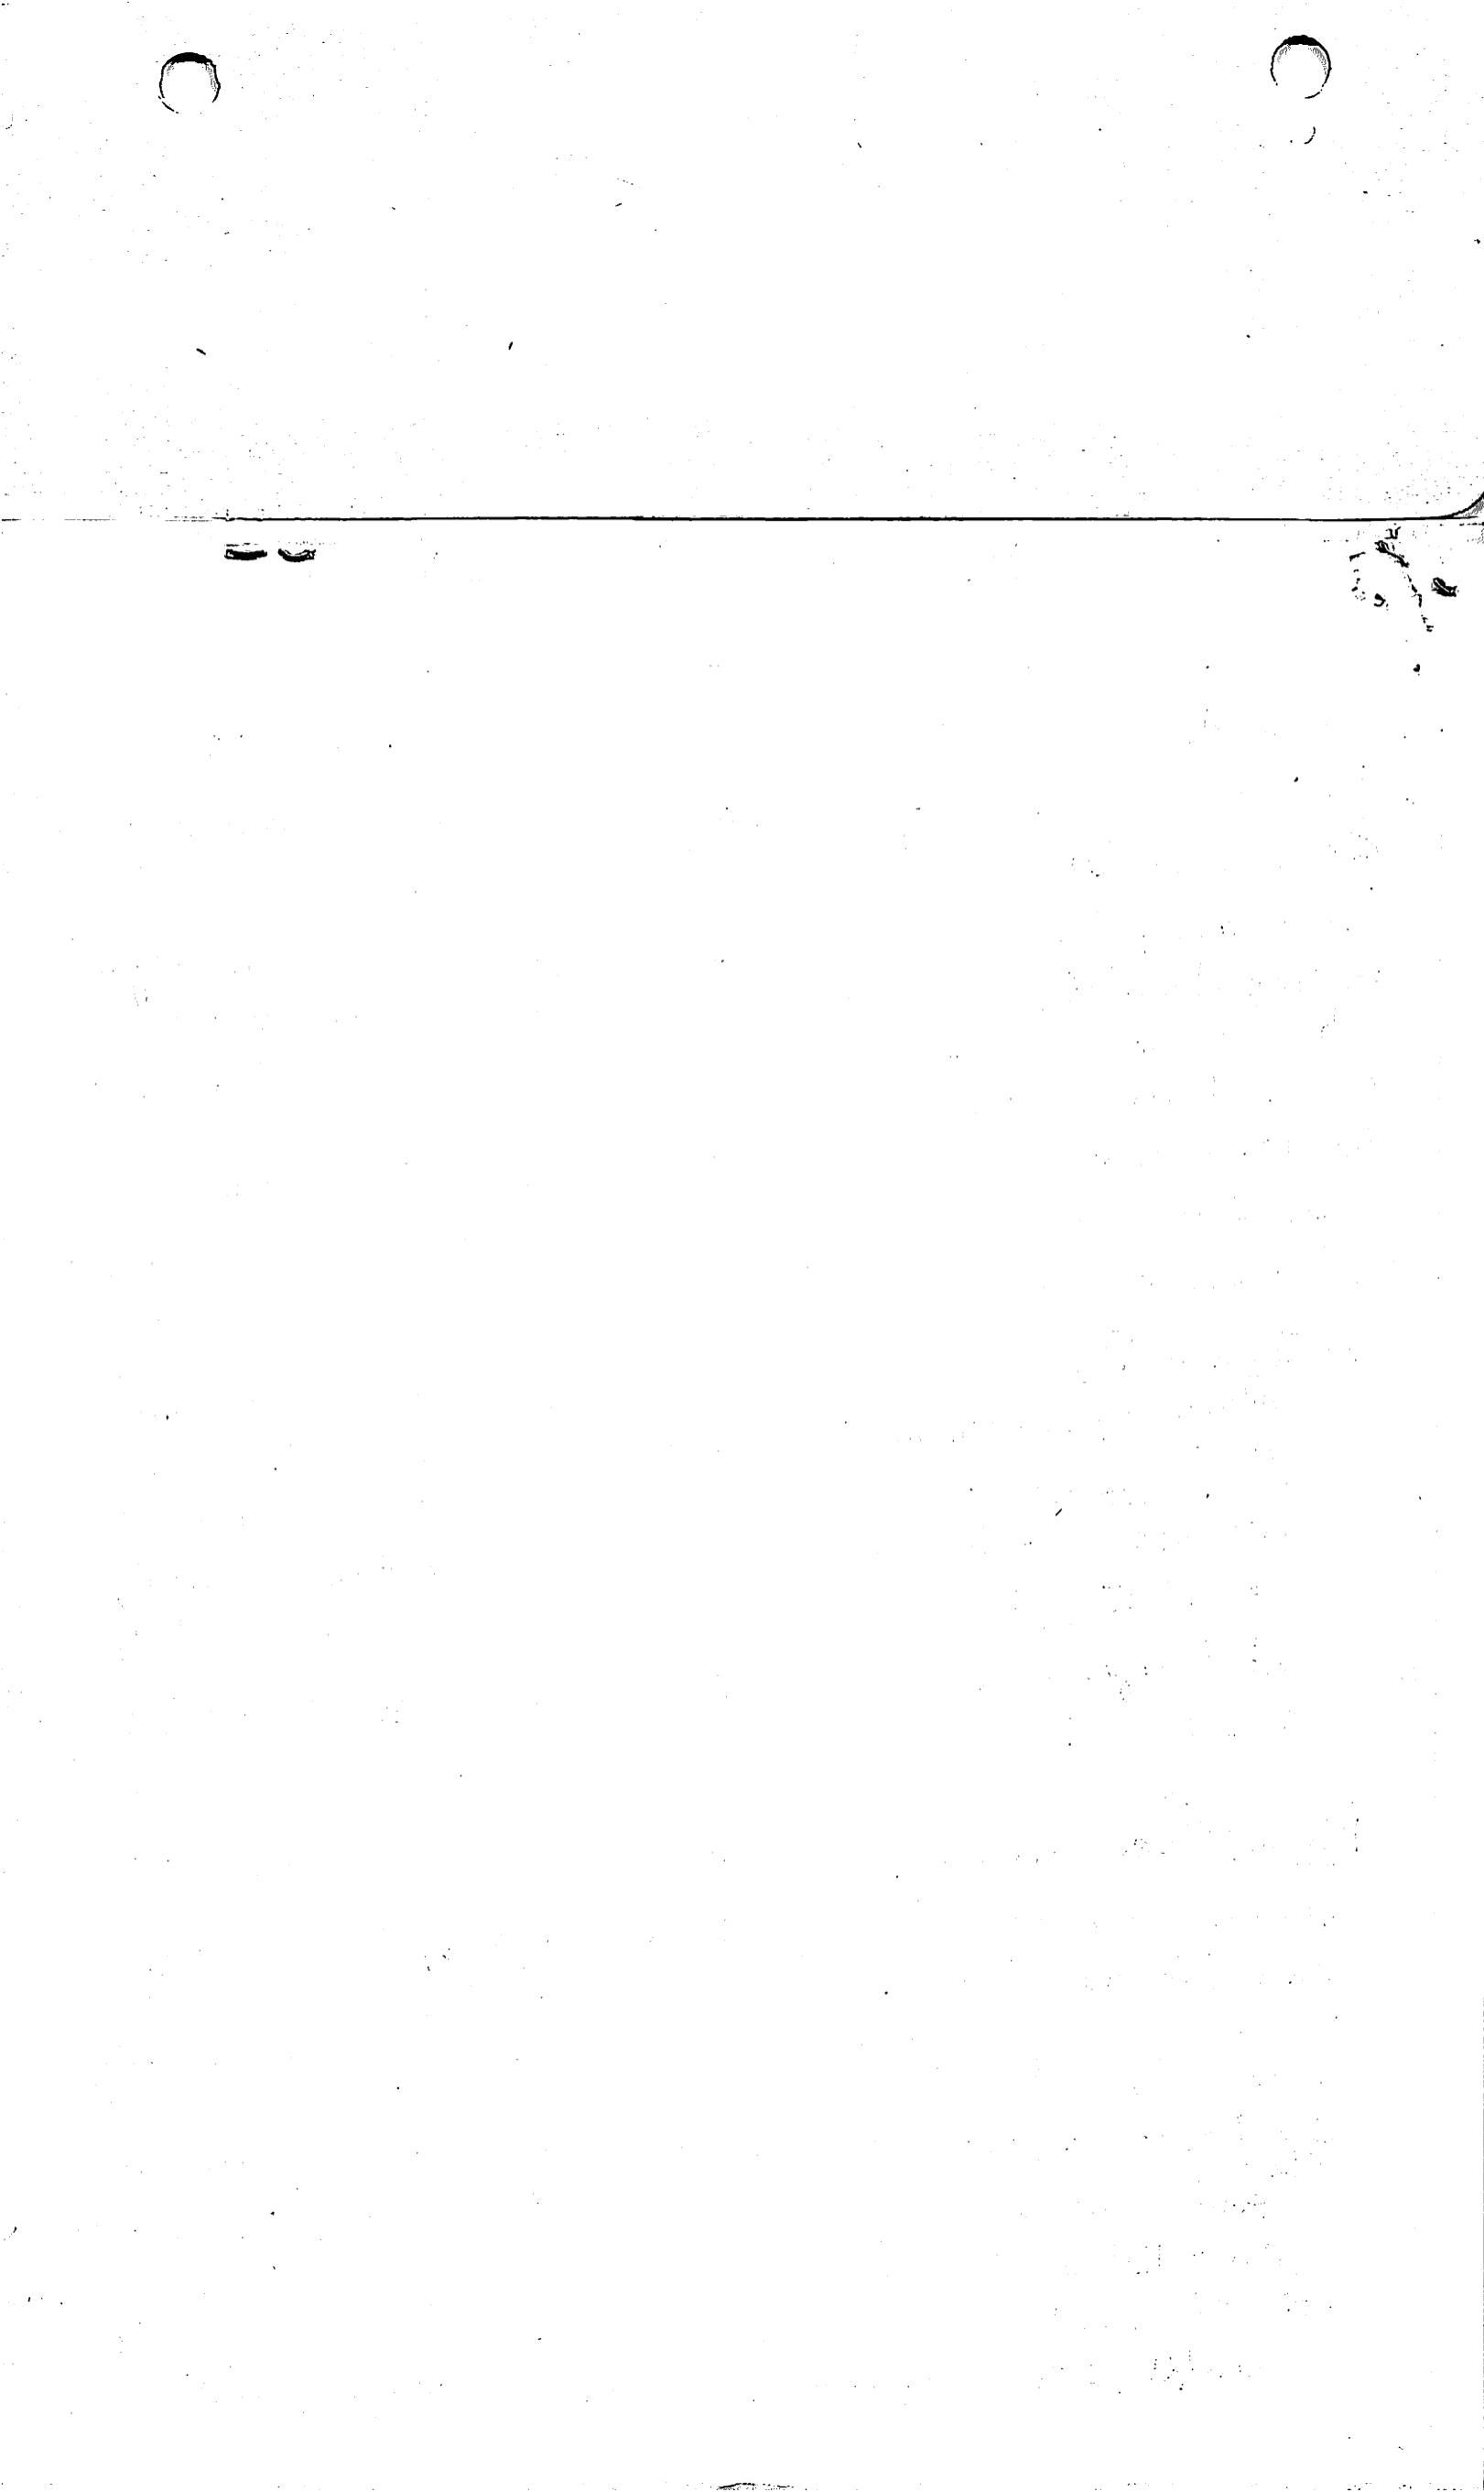

Valium (Diazepam) 10 mg IV	Prolonged Seizures
Dextrose 50% (25G) 50cc IV	Hypoglycemia Reaction
Narcan 0.4 mg 1cc IV	Narcotic Overdose
Ringer Lactate 1000cc	Hypovolemic Shock
Sodium Bicarbonate 7.5% IV	Reduce Acidosis
Atropine 1.0mg 10cc	Insecticide Poison (Cholinesterase Inhibitors)

If it would be useful (since I have the equipment), blood could be drawn for type & cross-match, and Glucose. The first, for pts in hypovolemic shock needing whole blood (packed cells), and the second for blood sugar level before giving a pt IV Dextrose 50%. Of course, since the distance to a medical facility like Wasatch County Hospital is at least 1-1½ hrs traveling time, I am not sure if this procedure would be valid.

If there is any other items or procedures that you think might be useful for me as a paramedic please let me know.

Thank you for your time and consideration you given me. I'll be coming into Heber City probably once a week and will make an effort to drop in and see you.

RE: Ms. Pat Robinson, RN

Dear Dr. Green:

Pat Robinson, an employee of Providence Medical Center for over five years, has demonstrated competence in all areas of responsibility.

1. She has demonstrated proficient clinical competence as an Assistant Head Nurse on the Oncology unit.
 - a. Especially proficient in intravenous therapy and medications.
 - b. Excellent assessment skills and nursing care,
2. She is very proficient in her role of Administrative Assistant, 11-7:30 a.m.
 - a. Good managerial skills and habits,
 - b. Communicates well with peers and subordinates,
 - c. Accepts direction well, tends not to be defensive,
 - d. Possesses good record-keeping habits,
 - e. Demonstrates willingness to accept responsibility,
 - f. Functions independently and is a self-starter,

Providence Medical Center regrets the loss of Pat's skills but wishes her success in her future endeavors.

Sincerely,

Roberta E. Sample

Roberta E. Sample, RN, Assistant Administrator, Patient Care Services
